

MILAN NIKOLIĆ

Izvanredni profesor

Sveučilište u Beogradu – Kemijski fakultet, Beograd, Srbija

Znanstveno se smatra proteinskim biokemičarom, koji uglavnom radi s proteinima živih boja. Najveće zadovoljstvo pronalazi u radu sa studentima i popularizaciji znanosti o životu (engl. Life Science), kroz popularna predavanja i osmišljavanje atraktivnih i zabavnih oglada [@mnikolic1971]. Na matičnom je fakultetu nosilac nekoliko kolegija iz područja biokemije. Član je različitih komisija i timova za unaprjeđenje nastave kemije. Također je vrlo aktivan u promoviranju STEM područja, osobito kemije. Za svoj je rad 2023. godine nagrađen Medaljom za izvanredne rezultate u nastavi od Srpskog kemijskog društva.

Trenutno je angažiran u okviru međunarodnog projekta vezanog uz ispitivanje mogućnosti korištenja ekstrakata algi kao medija za uzgoj mesa. Autor je niza znanstvenih članaka u području biokemije i toksikologije hrane.

Rođen i odrastao u gradu (<http://www.zajecar.info/>) u kojem se održava najstariji rock festival u ovom dijelu Europe (<https://gitarijada.rs/>). Veliki je ljubitelj glazbe (osobito one iz prve polovice 80-ih) i sporta (prije svega tenisa, nogometa i košarke).

MILAN NIKOLIĆ

Associate Professor

University of Belgrade – Faculty of Chemistry, Belgrade, Serbia

Scientifically, he is considered a protein biochemist, working mainly with vivid-colored proteins. He finds the greatest satisfaction in working with students, popularizing Life Science through popular lectures, and designing attractive and entertaining experiments [@mnikolic1971].

At his home faculty, he is the holder of several courses in the field of biochemistry. He is a member of various commissions and teams for the improvement of chemistry teaching. He is also very active in promoting STEM fields, especially chemistry. In 2023, he was awarded the Medal for Outstanding Results in Teaching from the Serbian Chemical Society for his work. He is currently engaged in an international project related to the possibility of using algae extracts as a medium for meat cultivation. He is the author of a number of scientific articles in the field of biochemistry and food toxicology.

Born and raised in the city (<http://www.zajecar.info/>) that hosts the oldest rock festival in this part of Europe (<https://gitarijada.rs/>), he is a big fan of music (especially those from the first half of the 80s) and sports (mainly tennis, football and basketball).
